### ABOUT ME

I am a professional focused on quality and communication, I love working in teams and contributing with creative ideas to solve problems. I love learning and teaching. I am a collaborative, helpful, detail-oriented person with an open mind to new knowledge.

I have knowledge in writing and automating test cases in JavaScript with Maven, Selenium, TestNG, and JUnit, as well as in Visual Studio Code with Python and Selenium.

### JOB EXPERIENCE

I have been working throughout this year as a freelancer in the QA Tester field. I have worked with JavaScript, Python, Visual Studio Code, Apache NetBeans, Selenium IDE, TestNG, and Selenium WebDriver. I have had meetings with the client to define objectives in test cases, report found errors, and conducted manual, unit, and end-to-end testing. I am a junior QA tester but with a strong desire to keep learning and further expanding my knowledge."
